TITLE : COMPOSITE MOBILE
COMMUNICATION TERMINAL AND
REMOTE CONTROLLER

ABSTRACT : PROBLEM TO BE SOLVED: To improve the operability by making it possible to perform remote control by one remote controller and also performing smooth switching between telephone and other functions.

SOLUTION: A control part 37 can remotely control a portable telephone function and a tape player function by one remote controller in common so as to switch a key part 38 and a display part 39 for a tape player or portable telephone function according to control data from a composite mobile communication terminal is for the telephone function or tape player function once receiving the control data from the composite mobile communication terminal, and the composite mobile communication terminal side also switches its function according to control data from the remote controller is for the tape player or portable telephone function, so the user can easily and smoothly switch both the functions.
